Research Overview

My research centers on multimodal foundation models, with key areas of focus including:

- **Generative Modeling for Scientific Discovery**, developing diffusion and flow-matching methods for general, medical, and biological generation, with an emphasis on faithful structure and data efficiency.
- **Self-Evolving Long-Horizon Agents**, developing agents that continually learn from experience and refine their planning, reasoning, memory, and tool-use capabilities across extended tasks and interactions.
- **Pre-training and Post-training of MLLMs**, improving domain adaptation, spatial reasoning, and robust alignment through data mixture design, instruction tuning, and preference optimization.

Education

Ph.D. Engineering and IT Sept. 2026 – Present	The University of Melbourne Advisor: Jianzhong Qi
M.E. Computer Science and Technology Sept. 2023 – Mar. 2026	Tongji University Advisor: Guosun Zeng
B.E. Intelligence Science and Technology Sept. 2019 – Jun. 2023	Dalian Maritime University

Selected Publications

The * sign denotes equal contribution. The † sign denotes corresponding author.

Honors and Awards

National College Mathematics Competition, National First Prize (1%)
Chinese Mathematical Society

Dec. 2022

Excellent Student Scholarship (10%)
Dalian Maritime University

Sept. 2021, 2022

Leadership and Communication Scholarship
Dalian Maritime University

Sept. 2020

Research Experience

- **On-Policy Distillation for World Models** **Mohamed bin Zayed University of Artificial Intelligence**
Advisor: Dr. Dongxia Wu *Aug. 2026 – Present*
 - Studied on-policy distillation methods for world models, focusing on transferring privileged temporal knowledge into deployable student views.
 - Explored identifiability-aware training objectives to avoid distilling information that is not recoverable from the student observation.
- **Reasoning in Multimodal Large Language Models** **Shanghai AI Laboratory**
Advisor: Dr. Ding Wang *Jan. 2025 – Jul. 2026*
 - Studied reasoning, memory, and world modeling in multimodal foundation models, with emphasis on reliable long-context and spatially grounded inference.
 - Developed methods for medical-domain mid-training, spatial-reasoning post-training, retrieval-augmented generation, and memory-augmented agents for long-horizon interaction.
- **Multimodal Generative Modeling for Cellular Perturbation** **Stanford University**
Advisor: Dr. Yuhui Zhang *Apr. 2026 – Jul. 2026*
 - Studied generative modeling for cellular perturbation, connecting microscopy-derived morphology with gene-expression responses under drug interventions.
 - Developed flow-matching models for faithful phenotype mapping, aiming to provide data-efficient generative baselines for computational pharmacology.
- **Vision-Language Models for Medical Imaging** **Tongji University**
Advisor: Prof. Guosun Zeng *Sept. 2023 – Mar. 2026*
 - Worked on brain medical imaging with diffusion models and VLMs, including modality reconstruction, abnormality detection, and segmentation.
 - Explored privacy-preserving distributed training for lightweight model collaboration across heterogeneous medical data and Non-IID clinical settings.
- **Text Sentiment Analysis Based on BERT Model** **Dalian Maritime University**
Advisor: Prof. Yijia Zhang *Sept. 2021 – May 2022*
 - Integrated BERT with LDA topic modeling for social-media sentiment analysis, supporting public-opinion tracking during the COVID-19 pandemic.

Internship Experience

Researcher Aug. 2026 – Present	Tongyi Lab, Token Foundry, Alibaba Conducting research on self-evolving AI systems.
Researcher Jan. 2025 – Jul. 2026	Shanghai AI Laboratory Conducted research on AI agents.
Algorithm Engineer Oct. 2024 – Dec. 2024	Beijing Jinxixin Network Technology Co., Ltd. Constructed and trained vertical-domain large models for maritime law scenarios.
Embedded Engineer Jun. 2023 – Aug. 2023	Shanghai NIO Automobile Co., Ltd. Controlled steering systems using multimodal sensing for rollover prevention in tire blowout scenarios.

Skills

- **Languages:** Chinese (native), English (IELTS: 7.0), Japanese, German.
- **Programming:** C, C++, Python, Java, Go, SQL, Rust, MPI, NCCL, DeepSpeed, Megatron-LM, DDP, FSDP, vLLM, verl, TRL.
